

Is Your Tuna Supplier an ISSF Participating Company?

Here's what ISSF participation means.

ISSF Participating Companies connect tuna sustainability commitments with independent verification and support for practical fisheries improvements.

Science-based commitments

Commit to ISSF conservation measures addressing traceability, illegal fishing prevention, bycatch, FAD management, and other priorities.

Independent audits & public reporting

Undergo annual third-party compliance audits, including checks against ISSF's traceability requirements, with published results showing performance and areas for improvement.

Vessel transparency

Help fund the ProActive Vessel Register (PVR) and Vessels in Other Sustainability Initiatives (VOSI), which provide independently verified information on specific vessel practices and initiatives.

Investment in practical solutions

Help fund ISSF research, on-the-water trials, and skippers' workshops to improve fishing practices and reduce ecosystem impacts.

Stronger fisheries management

Support ISSF's science-based advocacy to regional fisheries management organizations (RFMOs) and their member governments, and work to align advocacy priorities with NGOs and market stakeholders.

Progress toward MSC certification

Help fund ISSF's work to help tuna fisheries achieve MSC certification and address conditions to maintain it.

ISSF INTERNATIONAL SEAFOOD SUSTAINABILITY FOUNDATION

Learn more at **iss-foundation.org**

ISSF participation does not certify a company's tuna products.

What evidence supports your suppliers' sustainability commitments?

Explore ISSF company audit results, vessel information, and **science-based resources** to assess documented practices and progress against your own policies and requirements.
